

EZ-Fill Foam Tank Refill System

EZ-Fill is an easy to operate fixed-mount 12- or 24-volt drive 5-gpm foam tank refill pump system. EZ-Fill features push-button smart-switch technology. Just press the “Fill” or “Flush” button for a moment and the unit will cycle either filling the foam concentrate reservoir or running through a flush cycle. The unit is self-priming and will automatically shut off after 60 seconds or when the foam concentrate reservoir is full. The system can be configured to handle either a single-tank or dual-tank foam concentrate reservoir system.

- An electronic three-way valve behind the pump panel switches the system from “Fill” to the “Flush” function and back again
- Includes a configured wiring harness
- Can be configured to handle dual foam concentrate reservoirs for Class A and B foams
- Includes a Cam-lock quick connect suction hose designed for 5-gallon pail drafting operations. Suction hose is equipped with integral strainer to prevent intake of unwanted debris
- Pump panel control with Class 1® Smart-Switch panel and electronics. Takes up less valuable pump panel real estate compared to other brands
- Push button control. Smart switch automatically stops foam pump after 60 seconds or when the foam reservoir is full

Easiest to use CAFS in the industry!
