

SPV

Semi-Automatic Priming Valve

Hale's new Semi-Automatic Priming Valve, Model SPV, simplifies the priming operation of your pump. The innovative design replaces the standard priming valve while saving space on the pump panel. Easily activated by a push-button control, the electric button activates the primer motor creating a vacuum. The vacuum acts on the diaphragm in the valve causing the port to open to allow priming.

FEATURES

- Automatic priming valve actuator.
- Easy installation.
- Available for retrofit.
- Push button operation.
- Saves space on the pump panel
- Corrosion resistant bronze components.
- Remote mounted on front mount and PTO
- Direct mounted on midship pumps.
- Tested to 600 PSI pressure and 26 inches Hg vacuum.
- Replaces standard priming valve.

Midship pump valve is premounted to pump body
