Customer Service Designee:

### Body of the Bulletin

The SVS Torrent Valve is designed to use grease. The recommended types of grease are outlined below and can be found in Section 4, Routine Maintenance, of the SVS Installation and Service Manual, Hale p/n: 029-0020-90-0. Lubrication intervals vary dependent upon operating conditions (amount of usage, water conditions, etc.). When SVS Torrent Valves are inadequately lubricated it shortens the life span of smooth operation and causes unnecessary "downtime." The warranty on the SVS Torrent Valve is ten (10) years workmanship and two (2) years on the seals. **FAILURE TO PROPERLY MAINTAIN and LUBRICATE VALVES COULD RESULT IN WARRANTY DENIAL.**

### LUBRICANTS:

Use one of the following lubricants. DO NOT substitute other lubricants.

- **Never-Seez** - White Food Grade with PTFE, manufactured by:  
Bostik Findley, Inc.  
211 Boston Street  
Middleton, MA. 01949-2128  
Web: [www.bostikfindley-us.com](http://www.bostikfindley-us.com)
