

Open Mount Pumps

STYLE

Hale's Open Mount Pumps are ideal for wild-land and pump-and-roll fire suppression applications. With compact and user-friendly packaging, driven by an emissions compliant diesel engine, the Hale Open Mount Pumps are capable of delivering 300 up to 1,000 GPM of water.

Features

- Emissions compliant diesel engine with up to 200HP performance
- Generates NFPA 1901 rated flows up to 1000 GPM (3785 L/min)
- Hard, fine grain bronze, mixed flow impeller design is hand ground and balanced for maximum performance
- For minimal maintenance the spring-loaded mechanical seal is self-adjusting and self-lubricating
- Heavy duty precision ground, deep groove bearings used for long-life
- Heat treated one piece stainless steel pump shaft has been designed for strength and to minimize pump deflection
- Bronze clearance ring is easily replaceable
