

TBP

STYLE

Hale's TBP Twin Booster pump is a unique two-stage series/parallel pump that meets the demands for higher pump performance for structural fires while still retaining the ability to create the high pressures necessary to operate progressive hose lays and the capability of providing low speed pump and roll. The TBP is the first 750 GPM NFPA rated two stage series/parallel PTO driven fire pump in the market. Capable of 150 GPM (568 L/min) at 500 PSI (34.5 Bar) in pressure mode.

Features

- Generates NFPA 1901 rated flows up to 750 GPM (2839 L/min) from draft
- Hard, fine grain bronze, mixed flow impeller design is hand ground and balanced for maximum performance
- For minimal maintenance the spring-loaded mechanical seal is self-adjusting and self-lubricating
- Heavy duty precision ground, deep groove bearings used for long-life
- Heat treated one piece stainless steel pump shaft has been designed for strength and to minimize pump deflection
- Bronze clearance ring is easily replaceable

Applications/Solutions

- Fire OEMs
- Firefighting - Structural
- Firefighting - Wildland Forestry
